

SAULS CREEK RX

09/10/2018

CHARGE CODE: NFHF1318
OVERRIDE CODE: 0213

INCIDENT OBJECTIVES		1. Incident Name Sauls Creek RX	2. Date 09/10/18	3. Time 0700-TBD
4. Operational Period				
5. General Control Objectives for the Incident (include alternatives) -Maintain firefighter and public safety as the primary incident objective throughout all phases of incident implementation. -Resource Objectives: Increase the probability of natural ponderosa pine regeneration by the release of natural minerals and nutrients back into the soil. Additional benefits would include an increase in habitat diversity for many native wildlife species, including big game, through the regeneration of Gambel oak. - Top kill 30 to 80% of the Gambel oak stems less than 6 inches. - Raise average canopy base height 5 to 10 feet in the ponderosa pine stands. - Improve habitat for big game winter range and management indicator species associated with ponderosa pine ecosystems. -Prescribed Fire Objectives: Lower the probability of a running stand-replacing crown fire, thus reducing the risk to life and property, and natural resources, and decreasing financial cost of wildfire. Reduce surface fuels by the following amounts: - 1 hour fuels (less than 0.25" dia.) 30 to 70% - 10 hour fuels (0.25 to 1.0" dia.) 30 to 70% - 100 hour fuels (1.0 to 3.0" dia.) 10 to 50%				
6. Weather Forecast for Period Fire Weather Forecast will be printed morning of briefing and will be separate from the IAP				
7. General Safety Message RX WATCH OUT SITUATIONS: 1. You are burning with a plan that has not been approved by the appropriate agency administrator. 2. You are not a qualified Burn Boss but have been told to go ahead with the burn. 3. Objectives of the burn are not clear. 4. There are areas of the special concern within the burn unit that cannot be burned. 5. Private land and/or structure adjoin the burn unit. 6. You are uncomfortable with the prescription. 7. You have not requested a spot weather forecast. 8. You decide a test fire is not necessary. 9. You decide your personnel are old hands and a briefing is not necessary. 10. Escape probability is small so you do not bother with a contingency plan. 11. You or the Ignition Specialist is beginning to lose control of the ignition pattern after starting. 12. Mop-up and/or patrol instructions are not specified or understood by the holding personnel. 13. You have not lost one in a long time and are starting to feel a little smug.

Patient Transport Categories

Level One	
Immediate lifesaving intervention required	Automatic launch-Flight for Life + Hoist Helicopter +Emergency Ground Response. RESPONSE CONTINUED UNTIL PATIENT TRANSPORTED

Level Two	
Significant Injury with high risk of needing lifesaving intervention	Automatic launch-Flight for Life + Emergency Ground Response Standby Hoist Helicopter RESPONSE CONTINUED UNTIL PATIENT TRANSPORTED

Level Three	
Patient with moderate risk of needing lifesaving intervention	Automatic launch -Emergency Ground Response Automatic Airborne Standby -Flight for life RESPONSE CONTINUED UNTIL PATIENT TRANSPORTED

Level Four	
Patient with low risk of needing lifesaving intervention	Automatic launch-NON emergency Ground Response Automatic Ground Standby-Flight for life

Level Five	
Patient with no risk of needing lifesaving intervention	Agency/Crew/Engine/Safety Officer Transport

Trauma Assessment Categories

Level One	
Immediate lifesaving intervention required	Examples- Unstable airway, severe facial trauma with compromised airway, facial burns, suspected head injury with LOC > 5 min, positive MOI for spinal cord injury, cardiac injury, open chest wound, flail chest, pelvic trauma, multiple long bone fractures, penetrating trauma to the head/neck/ face, electrical injury, greater than 20% surface area burn combined with any other injury, multi system trauma, arterial bleeding, massive crush injury. Vitals -Systolic BP<100 (No peripheral pulse) or cardiac arrest, GCS< 8

Level Two	
Significant Injury with high risk of needing lifesaving intervention	Examples-Facial trauma with NO airway compromise, pelvic fractures with no shock, suspected pelvic fracture, multiple long bone fractures with no shock, known solid organ injury, amputation of distal extremities, open fractures, penetrating trauma with no arterial bleeding and stable vital signs, falls less than body height, GCS 9-13 with LOC< 5min

Level Three	
Patient with moderate risk of needing lifesaving intervention	Examples- Dehydration, possible bone fractures, heat related illnesses, abdominal pain, immobilized with no significant injury, LOC < 5 min, GCS 14-15, superficial soft tissue trauma

Level Four	
Patient with low risk of needing lifesaving intervention	Examples -General cold, minor lacerations, sprains, strains, flu like symptoms, severe blisters, poison ivy reaction, rash.

Level Five	
Patient with no risk of needing lifesaving intervention	Examples -Nuisance aches and pains, minor blisters, minor sunburns.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)		
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other		
Patient Location			Descriptive Location & Lat. / Long. (WGS84)		
Incident Name			Geographic Name + "Medical" (Ex: Trout Meadow Medical)		
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)		
Patient Care			Name of Care Provider (Ex: EMT Smith)		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG page 106					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
